EXPERIENCE

Frontend Engineer (AI Training – TypeScript/JavaScript) | Revelo [Dec. 2025 – Present]

- Contributed to AI training and evaluation workflows by developing and refining datasets, prompts, and logic using JavaScript and TypeScript.
- Improved model response quality through structured problem-solving and real-world scenario simulations.

Software Developer (Frontend Focused, Backend Inclusive) | FUMMSA (University) [Aug 2024 – 2025]

- Designed and developed student dashboard, course registration flow, and result checking module.
- Integrated backend APIs for efficient data flow and system reliability.

Lead Frontend Developer and Trainer | Equidaecore Integrated Nigeria Limited [Jun. 2021 – Present]

- Led frontend development and training initiatives. Built responsive web applications, mentored - junior developers, and delivered structured training programs.
- Contributed as a frontend developer to institutional platforms, improving usability and performance.

PROJECTS

Alumni-Bridge | (TypeScript/React/TailwindCSS)

- Open-source alumni portal helping institutions build thriving public alumni networks. Manage directories, events, jobs, and donations in one place.

Exit-Clearance | (JavaScript/Express/NodeJS/MongoDB)

- Web-based portal digitizing organizational exit clearance processes, replacing paper forms with centralized department approvals.

Up-NEPA | (TypeScript/React/TailwindCSS)

- Tracks power outage/restoration and electricity usage via connected hardware device. Ideal for users with both generator and grid power, or homeowners needing remote energy monitoring.

Always-On-Top-Rust | Rust

- Lightweight Windows utility allowing users to pin multiple windows as "always on top" using global hotkeys, with visual overlay borders.

Workspace Manager (WSM) | Rust

- Rust-based command-line tool for efficient workspace management.

TECHNICAL SKILLS

Languages/Markup: TypeScript, JavaScript (ES6+), React, Next.js, HTML, CSS, Rust.

Frameworks/Libraries/Tooling: React, Node.js, Express, Tailwind CSS, Zod, Rust (Tokio, Axum, Serde, SQLx).

Databases: PostgreSQL, MongoDB.

Testing: Unit Testing, Integration Testing

Tools: Git, GitHub, Docker, Linux, NPM, VS Code, Visual Studio

EDUCATION

Software Development Training | Equidaecore Integrated Nigeria Limited

[2021 – 2024]
